FM36179

KeeNect®

KEENECT is a unique, modular balustrade and handrail system offered by **Kee Safety Ltd.** This system has been designed to solve the unique nature of staircases, landings, balconies and ramps. The versatile system can cope with virtually any problem that your building or design may create, e.g. complex bends, tight turns and steep treads. The **KEENECT** system can be used on interior or exterior projects; in balustrades for stairways, wall mounted handrails or guard rails on the top of balconies and parapets.

Our modular, in-line balustrade system uses many standard off-the-shelf components and offers great flexibility in the design and installation of staircases. This has been achieved by the innovative design of a handrail connector and joint system. The **KEENECT** system offers a variety of infill options from horizontal rails to solid panels made of toughened glass or composite materials.

Staircases are high traffic areas and balustrades and handrails require durability and strength. Build quality and design are therefore of the highest importance. The **KEENECT** system has been developed to comply with the requirements of **British Standards and Building Regulation Part K** in terms of loading, handrail diameter and height. When purchasing **KEENECT** from **Kee Safety Ltd.**, you can be assured of unrivalled technical support. Our technical team can offer practical assistance either over the phone or by fax or if required check your designs or drawings for compliance with safety standards.

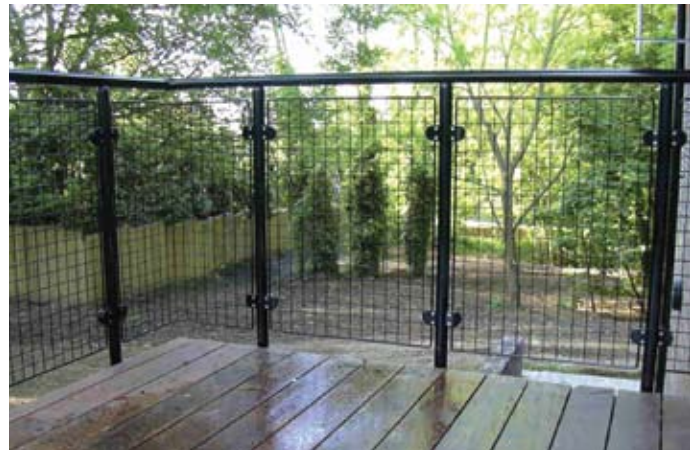

We offer a full design and installation service through our **KEE PROJECTS** division, assuring you of a safe installation fully compliant with all major standards and statutory requirements.

Features of the KEENECT system

- **Innovative design**
- **High degree of modularity**
- **Flexible balustrade solution**
- **Modern look and feel**
- **Complies with relevant British Standards and Building Regulation Part K**
- **Wide range of balustrade options**

Benefits of the KEENECT system

- **Versatile balustrade system using standard, off-the-shelf components**
- **Unique connectors cope with virtually any bend, ramp or gradient**
- **Choice of three upright fixing options, and a variety of infill alternatives**
- **Choice of RAL colours to enhance any environment**
- **Offers durability and strength necessary in high traffic areas**
