

SCOTT *YOUR CITY CENTRE IRONMONGER*

REAL DEALS FOR YOU™

This years "Real Deals For You" promotion, which will be available in the coming weeks, features some of the UK's leading brands.

With just under 100 different items there is something for everyone whether you are a joiner, builder, engineer or a DIY enthusiast.

Prices range from £1.24 for a screwdriver up to £582.50 for a rolling tool cabinet c/w tools.

Christmas Holiday 2017
Close: Friday 22nd December 2017 @ 5.00pm
Re-open: Tuesday 2nd January 2018 @ 07.30am

DoorSense

Preventing a fire door from closing can put your insurance at risk and land you in court if a fire takes hold. But you still need a way to hold a fire door open for ease of access.

DoorSense is the new way for you to keep a fire door open and have it close if the alarm sounds, or at a set time.

DoorSense is a standalone unit which can be fixed to a fire door in seconds to provide a reliable way to keep it open but will automatically release if the fire alarm sounds. DoorSense is incredibly easy to install, needing no wiring or special skills it can even use the same footprint as some older units. Once fitted, DoorSense is powered by two Alkaline C batteries for long working life, and has a Low Battery indicator to help you keep the unit in excellent working order.

Once in place you can have it working manually or automatically via a timer to set a night release time, and then leave DoorSense to get on with the job of giving easy access while keeping your staff safe.

DoorSense is designed to be robust and practical. A curved, fire-retardant casing helps to deflect impacts and stay looking smart even when subjected to extreme treatment, while the unit footprint allows it to be a direct retro fit for older fire door hold open devices.

Suitable for use with fire rated doors using door closers with power rating EN3-7

194mm Wide. 207mm High. 43mm Deep.

Available in the following colours: Black (from stock), Red & White.

Compliant with BS EN 1155

Retro V Door Closer

The new, easy way to replace Briton 2003 Series door closers and keep your existing door...the new, high performance RetroV from UNION

Identical fixing dimensions and footprint to popular UK door closer designs including Briton 2003, 2004 and 2003V

Sympathetically designed to blend with other traditional door closers that have been used or are currently fixed to nearby doors.

Suitable for both fire resistant timber and metal doors as well as other internal doors

Sizes EN 3-4 wind through adjustable rack & pinion door closer, adjustable closing forces to suit application.

Fully tested as both size EN3 and EN4 in all 3 fixing positions

Ideal for retro fit but also highly suited to 1st fit applications

Specifications:

Aluminium body, steel armset

Independent door speed and latch controls

Non-handed with adjustable power for maximum flexibility

Concealed fixings and adjustment controls

Square steel cover (designed to match existing units)

Fully adjustable armset

Supplied complete with screws and parallel arm bracket, easy to use template and pictorial fitting instructions.

Max door width is 1100mm and max door weight is 80kg (all 3 install positions)

Max opening angle 130 degrees

Finish in SE Silver

3rd party tested to BS EN 1154

PRO

**HARD
CONSTRUCTION
MATERIALS**

Pro-line Hard Construction Materials Blades have been expertly developed with a soft bond so they can effectively cut through very hard materials such as granite with relative ease. The 10mm angled turbo segments and narrow gullets reduce the chance of segment loss & maximise performance. Manufactured with premium quality diamonds and a strengthened, pre-stressed metal body.

Ideal for use on granite, hard concrete, engineering bricks, reinforced concrete and all hard construction materials.

Available in

- 115mm x 10mm x 22mm
- 230mm x 10mm x 22mm
- 300mm x 10mm x 22mm
- 350mm x 10mm x 22mm
- 100mm Segment Height

EXPERT

**UNIVERSAL
CONSTRUCTION
MATERIALS**

Our Universal Construction Materials Diamond Blade is a superior quality diamond blade designed for maximum performance on ALL construction materials. Undercut protection technology protects the segment from abrasion, reducing the risk of segment loss and increasing product life. Laser welded segments ensure maximum strength, performance and reliability. No need to change blades meaning higher productivity for the operator.

Ideal for use on steel, plastics, asphalt, tiles, granite and all construction materials.

Available in

- 115mm x 10mm x 22mm
- 230mm x 10mm x 22mm
- 300mm x 10mm x 22mm
- 100mm Segment Height

New Items Added to Range

Soft Grip Chisel Set In Storage Wallet

These Faithfull Chisels have drop forged chrome vanadium steel blades, which have been hardened and tempered. Their bevel edge design are ideal for cutting into tight corners.

The chisels have impact resistant polypropylene handles with soft grips for user comfort. They have steel striking caps and heavy-duty, drop forged ferrules and tangs for working strength. Suitable for use on soft or hard wood.

This 4 piece set contains the following sizes: 12, 19, 25 and 32mm.

Chrome Vanadium Combination Spanner Set

Professional high quality combination spanners, forged from chrome vanadium steel, hardened, tempered and satin chrome plated for corrosion protection. Manufactured to DIN 3113.

Broached jaws and rings to ensure a consistent tolerance and a guaranteed accurate fit. Both the jaw and ring end are set at a 15 degree offset for ease of use in awkward positions.

Contents: 6, 8, 10, 11, 12, 13, 14, 17 and 19mm.
